

# POST FALLS Community Forest

# Climbing Walls

## NEW ROUTES

To keep the climbing safe, and to fit in with other Post Falls Community Forest users, a new route checkout system has been adopted.

ALL NEW ROUTES – TRAD, SPORT OR BOULDERING – NEED TO GO THROUGH THE SYSTEM.

Before doing ANY cleaning or rigging Please get a NEW ROUTE APPLICATION form from the CITY OF POST FALLS PARKS AND RECREATION OFFICE at 408 Spokane St. Or by calling 208-773-0539

This system will help you rig your route and assist with subsidized hardware.

CHECK THE GUIDEBOOK FOR COMPLETE DETAILS

## CLIMB SOFTLY

Please help keep this area clean, safe, and pleasant.

- Do not remove or tamper with any fixed anchors. If you have a query, comment or complaint, please contact us through the guidebook or the New Route permitting system.
- Please do not toprope directly through the steel lower-off links: this will very quickly wear them badly and create a safety hazard.
- Stay on the trail wherever you can; pack out all your litter (including butts!); pack out any other litter you find and please take care of the flowers.

## BE SAFE

- This rock is steep. The climbing is strenuous. Watch for the burn.
- There are areas of shattered rock and the winter ice can loosen up last year's good holds. Be careful and cautious.
- The fixed pro on sport routes cannot always ensure that you will have a clean fall – there are ledges and flakes to hit on the way down! Evaluate your fall potential before you commit to the flight.
- The first pro bolt is sometimes way up there. A STICK CLIP can prevent a nasty ground fall.
- On this steep rock, trad and mixed routes may have natural pro that is tricky and strenuous to place. If in doubt, consider a toprope inspection.

## CAUTION

CLIMBING BY ITS VERY NATURE IS POTENTIALLY HAZARDOUS

CLIMBERS, BY THEIR USE OF THIS AREA, ASSUME ALL RESPONSIBILITY FOR THEIR OWN SAFETY. This means that climbers must use their judgment to evaluate the risks involved in climbing these routes.

Volunteers have made an effort to enhance safety by installing fixed anchors and clearing loosened rock, but NO ONE can make ANY guarantee that a route will be totally safe – or stay that way.

Weather and time may weaken good holds and anchors may deteriorate. CHECK OUT ALL SAFETY SYSTEMS FOR YOURSELF!!!

Beginner climbers are strongly advised to seek experienced and qualified instruction before climbing here.

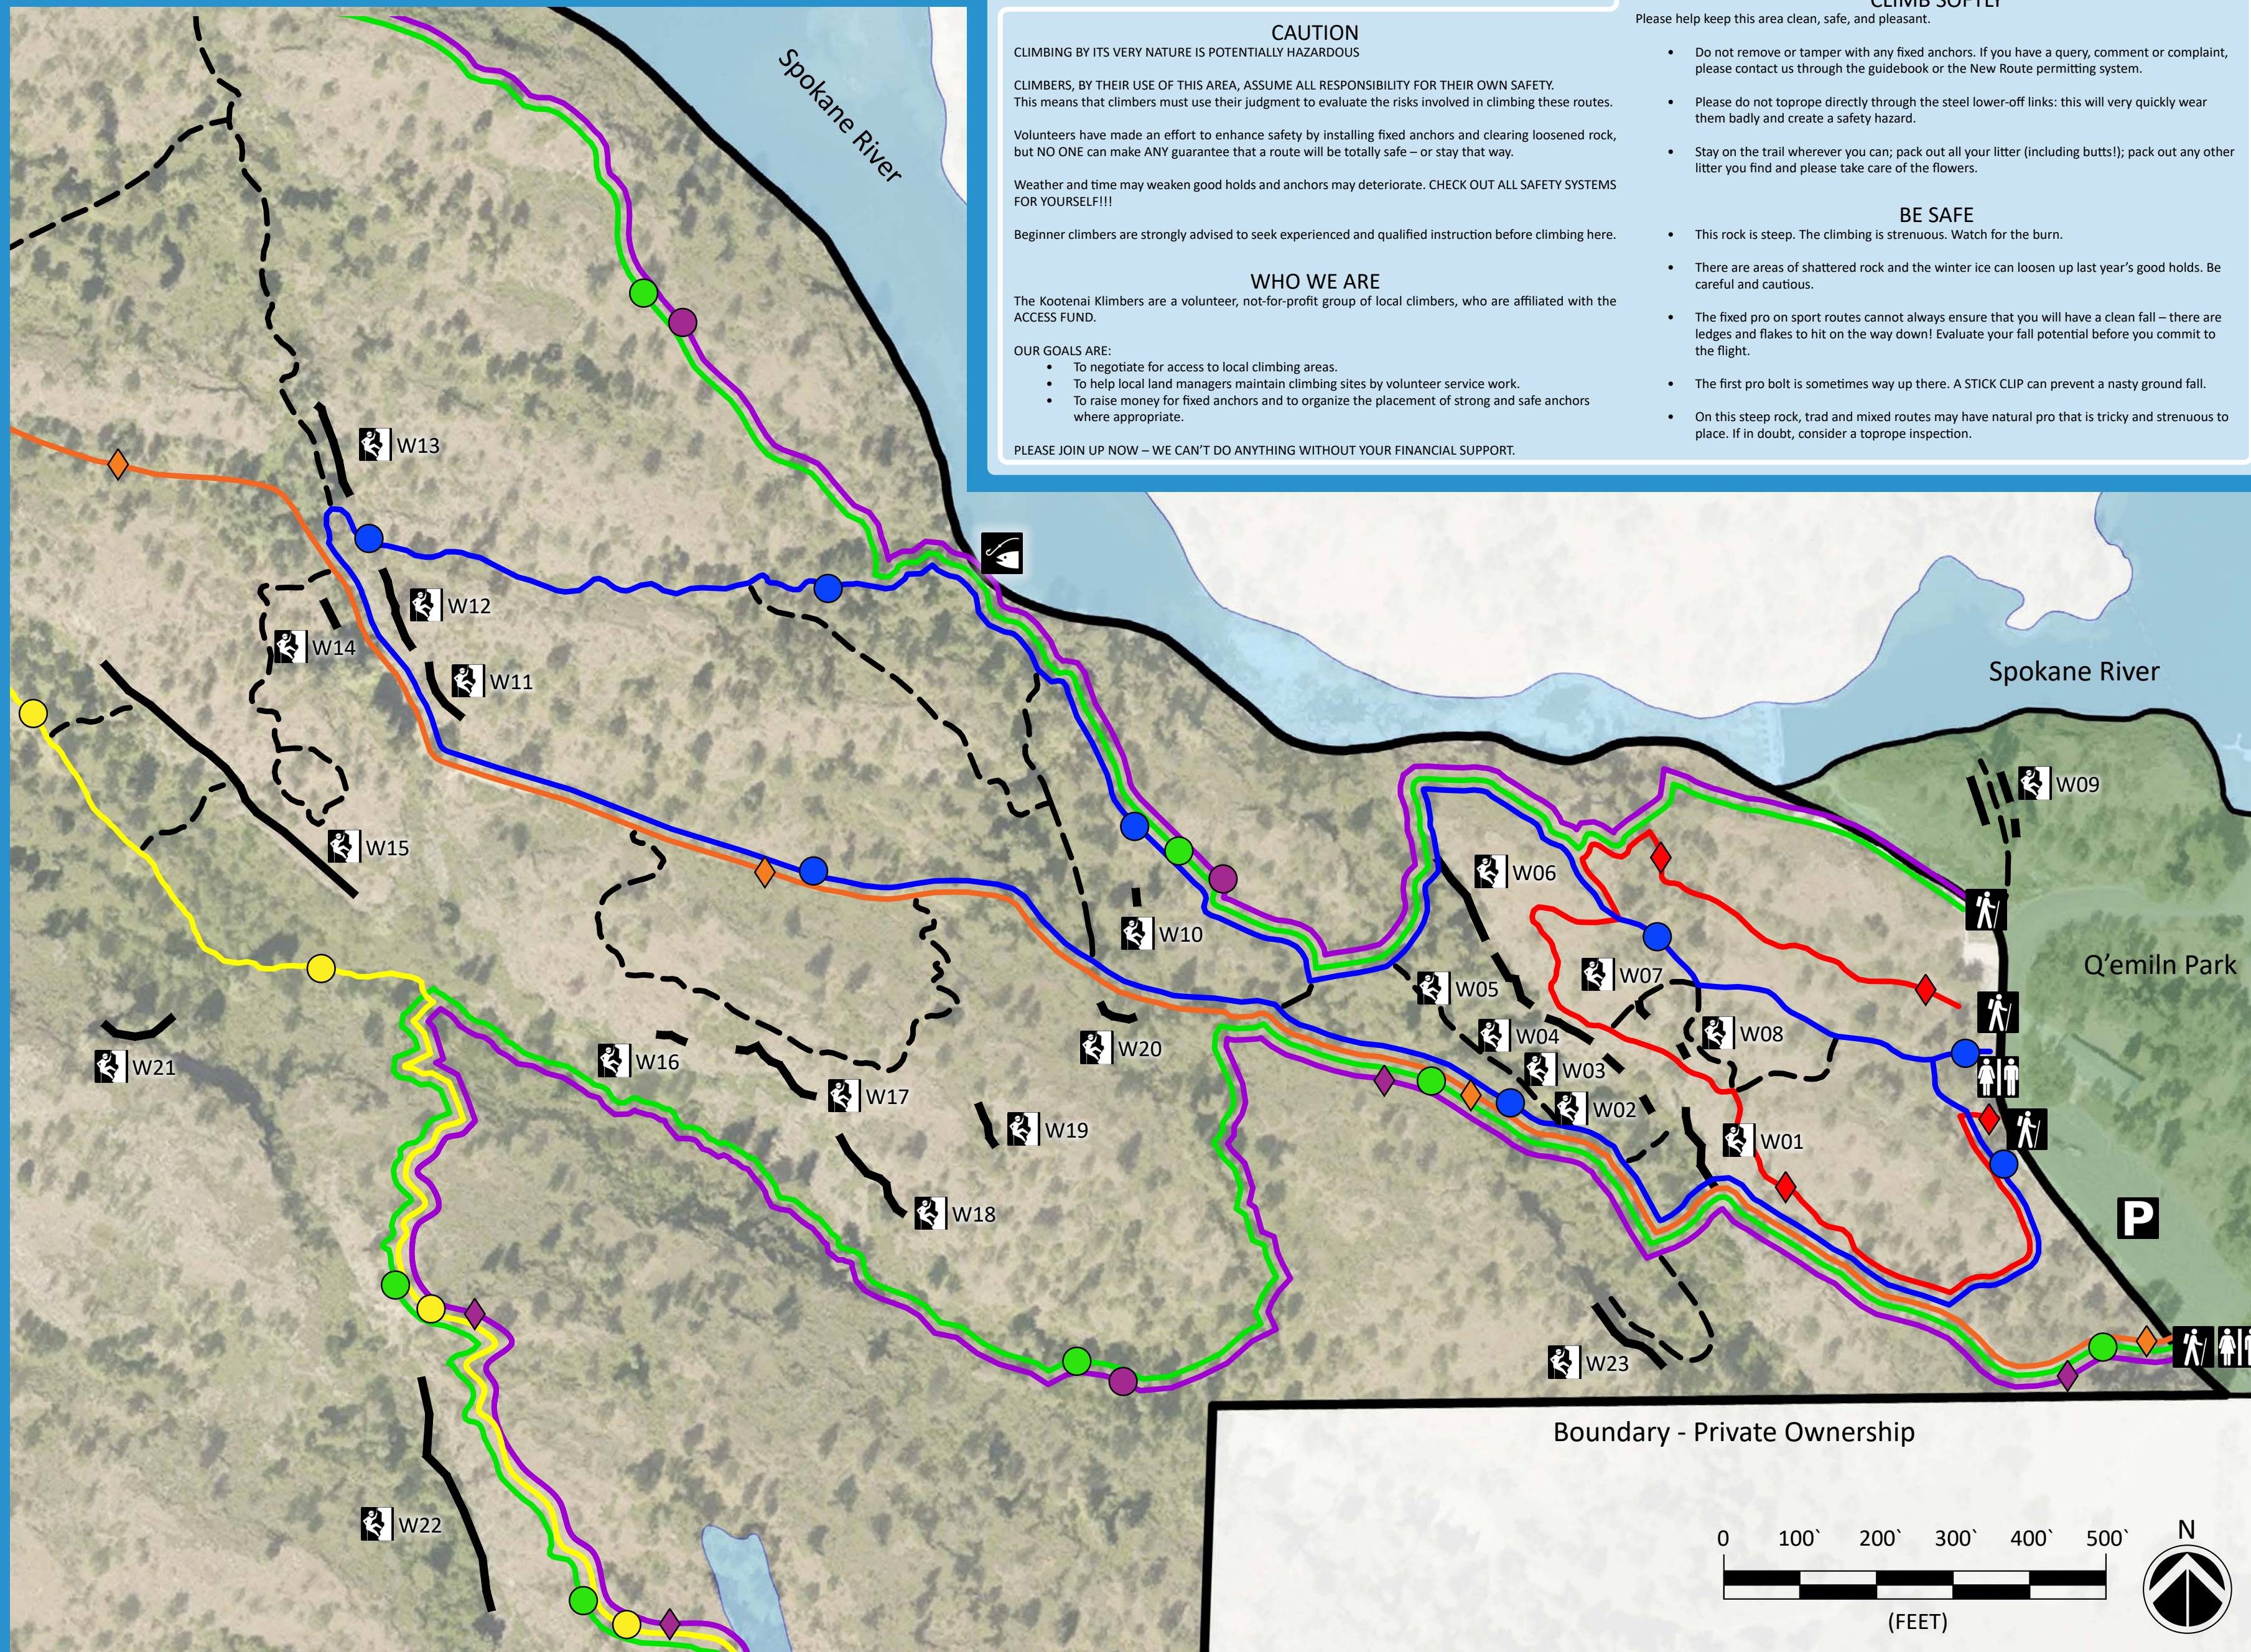

## WHO WE ARE

The Kootenai Klumbers are a volunteer, not-for-profit group of local climbers, who are affiliated with the ACCESS FUND.

OUR GOALS ARE:

- To negotiate for access to local climbing areas.
- To help local land managers maintain climbing sites by volunteer service work.
- To raise money for fixed anchors and to organize the placement of strong and safe anchors where appropriate.

PLEASE JOIN UP NOW – WE CAN'T DO ANYTHING WITHOUT YOUR FINANCIAL SUPPORT.

## Trails

Trail	Length	Trailhead
Loop	.38 Mi.	Q'emiln Park
Loop	1.1 Mi.	Q'emiln Park
Loop	3.7 Mi.	Q'emiln Park
Loop	3.6 Mi.	W. Riverview Dr.
One-way	3.0 Mi.	Both Trailheads
One-way	2.3 Mi.	Both Trailheads
One-way	1.9 Mi.	Both Trailheads
----		Climber Access Route

## Legend

- Rock Climbing Walls
- Climbing Walls and Boulders
- Parking
- Restroom
- Trailhead
- Fishing Location
- Nearby City Park

More detailed information about the abundant rock climbing opportunities at the Post Falls Community Forest can be found in our guidebook, The Northwest Passage.
